## SUSPICIOUS TRANSACTION REPORT (STR)

### 1. \*\*REPORT METADATA\*\*

- \*\*Subject ID:\*\* CUS-1010
- \*\*Subject Name:\*\* Rohan Das
- \*\*Filing Classification:\*\* High Priority Suspicious Activity Filing
- \*\*Core Typology:\*\* Extracted from Typology Match

### 2. \*\*EXECUTIVE SUMMARY\*\*

- This report is filed due to significant discrepancies between the declared income of the subject and the transaction volume observed, including two incoming wire transfers totaling \$43,000 in a single day. These transactions raise red flags indicative of potential money laundering activities.

### 3. \*\*SUBJECT & KYC CONTEXT\*\*

- Rohan Das is identified as a "Day Trader" with a declared monthly income of \$4,000. However, the transaction activity observed, particularly the incoming wire transfers totaling \$43,000 in one day, far exceeds this income level. The account, which is only 6 months old, lacks a trading history that would justify such high transaction volumes, raising concerns about the legitimacy of the funds.

### 4. \*\*CHRONOLOGY OF SUSPICIOUS TRANSACTIONS\*\*

| Date       | Transaction Type       | Amount       | Counterparty       | Reason for Flagging                     |
|------------|------------------------|--------------|--------------------|-----------------------------------------|
| -----      | -----                  | -----        | -----              | -----                                   |
| 2026-03-01 | Incoming Wire Transfer | +\$25,000.00 | Unknown Individual | Amount exceeds expected monthly income. |
| 2026-03-01 | Incoming Wire Transfer | +\$18,000.00 | Unknown Individual | Amount exceeds expected monthly income. |

### 5. \*\*TYPOLOGY & REGULATORY GUIDELINES ANALYSIS\*\*

- The transactions align with the FATF Recommendation 10 on Customer Due Diligence and Recommendation 21 on Reporting Suspicious Transactions. The rapid movement of funds from unknown counterparties is consistent with the FIU-IND Guidance Note on Rapid Movement of Funds, indicating potential money laundering activities.

### 6. \*\*FALSE-POSITIVE VS TRUE-POSITIVE EVALUATION\*\*

- This case cannot be classified as a false positive due to the following factors:
- The transaction amounts significantly exceed the declared income, raising immediate concerns.
- The rapid succession of large inflows from unknown individuals is atypical for a day trader, suggesting potential layering or integration of illicit funds.
- The lack of identifiable counterparties further complicates the legitimacy of the transactions, as legitimate trading typically involves known and reputable sources.

## 7. **\*\*COMPLIANCE OFFICER CONCLUSION & RECOMMENDED ACTIONS\*\***

- Given the confirmed suspicious typologies, including high-value transactions from unknown counterparties and the evolution of the account's risk profile, it is recommended to:

- **\*\*Freeze the account\*\*** to prevent further transactions until a thorough investigation is conducted.
- **\*\*Monitor all future transactions\*\*** closely for any additional suspicious activity.
- **\*\*Escalate the matter to law enforcement\*\*** for further investigation into potential money laundering activities.

This STR is submitted for regulatory review and further action as deemed appropriate by the authorities.
